GLOBAL FORENSIC AUDIT
Date: February 12, 2026

GLOBAL FORENSIC AUDIT

*Investigation of Crimes Against Humanity:
Genetic Modification, Pharmaceutical Industry, Electromagnetic Weapons, and Systemic
Population Control*

EXECUTIVE SUMMARY

Objective: To establish true motives, cause-and-effect relationships, and corrupt shadow connections between various systems affecting the human population.

Key Findings:

- Systemic connection identified between mRNA vaccines, endocrine disruptors, and fertility decline
- Massive environmental contamination by "forever chemicals" (PFAS), pesticides, and microplastics documented
- Connection between electromagnetic radiation, frequency technologies, and biological effects discovered
- Role of pharmaceutical industry in creating dependencies and premature mortality established
- Historical precedents of government experiments on human subjects revealed

1. INTRODUCTION AND METHODOLOGY

This audit represents a comprehensive investigation combining data from:

- Official documents and reports from government agencies
- Scientific publications and meta-analyses
- Court documents and settlements
- Historical archives and declassified materials
- VAERS and other adverse event databases

Investigation Period: 1920s — present (2026)

Geography: Global coverage with focus on USA, Europe, Russia

2. HISTORICAL CONTEXT: GOVERNMENT EXPERIMENTS ON HUMANS

2.1 Tuskegee Syphilis Study — 1932-1972

Facts: The U.S. Public Health Service conducted a 40-year study on 600 African American men, deliberately withholding penicillin treatment even after its discovery.

Victims: 128 died from syphilis or complications, 40 wives infected, 19 children born with congenital syphilis.

Source: CDC, Tuskegee Timeline

2.2 Guatemala Experiments — 1940s

Facts: U.S. and Guatemalan doctors intentionally infected at least 1,308 people (soldiers, prisoners, hospital patients, sex workers) with syphilis, gonorrhea, and chancroid.

Methods: Paid sex workers to transmit diseases, used syringes for infection, conducted invasive medical inspections on orphanage children.

Source: OAH.org, "The Hidden U.S. Experiments in Guatemala"

2.3 Edgewood Arsenal — 1948-1975

Facts: Approximately 7,000 U.S. service members were exposed to 254 different chemicals without proper informed consent.

Agents: Nerve agents (sarin, VX), psychoactive substances (LSD, PCP, cannabinoids, BZ), lethal pathogens (plague, anthrax).

Result: In 2023, a federal appeals court ruled veterans may receive compensation backdated to their military separation (50+ years).

Source: VVA Veteran, "The Edgewood Arsenal Secret Experiments Claims"

2.4 Radiation Experiments — 1940s-1960s

Facts: During the Cold War, scientists conducted biological tests on civilians using tracer isotopes, soldiers crawled through radioactive dirt, workers exposed in "hot cells."

Statistics: At least 33 instances exceeding federal radiation standards, 228 examples of human exposure at levels now considered dangerous.

Source: SF Public Press, "Cold War Scientists Pushed Ethical Boundaries With Radiation Experiments"

2.5 Porton Down, United Kingdom

Facts: Since 1916, research on chemical and biological weapons. In 1950s-1970s, aerial tests spraying zinc cadmium sulfide over civilian areas, bacteria in London Underground.

Death of Ronald Maddison (1953): Soldier died after sarin drops applied to forearm. 2004 inquest ruled unlawful killing.

Source: Grey Dynamics, "Secret Bases: Porton Down"

3. PHARMACEUTICAL INDUSTRY: THE OPIOID CRISIS

3.1 Purdue Pharma and the Sackler Family

Charges: Purdue Pharma, under Sackler family leadership, invented, manufactured, and aggressively marketed opioid products, particularly OxyContin, fueling the addiction epidemic.

Deceptive Methods:

- Representatives instructed to tell doctors OxyContin was not addictive
- Use of medical "thought leaders" to promote opioid "safety"
- Payment to physicians for promoting OxyContin
- Concealment of addiction and overdose data

Legal Outcomes:

- 2020: Purdue pleaded guilty to three federal charges
- Criminal fine: \$3.544 billion
- Civil settlement: \$2.8 billion
- 2025: Sackler family agreed to pay \$6.5 billion over 15 years
- Total settlement: \$7.4 billion

Scale of Damage: Over 450,000 opioid overdose deaths over two decades. Nearly half of addiction cases began with a doctor's prescription.

Source: U.S. Department of Justice, New York Attorney General, PMC

4. mRNA VACCINES AND GENETIC MODIFICATION

4.1 Mechanism and Controversial Issues

Manufacturer Claims: mRNA in vaccines does not integrate into human DNA, remains in cell cytoplasm.

Identified Adverse Effects:

- **Myocarditis and Pericarditis:** Most common serious adverse effects, especially after second Moderna dose. Highest risk in males 16-25 years.
- **Neurological Conditions:** Acute disseminated encephalomyelitis (ADEM) — 1 case per 1.75 million vaccinated.
- **Blood Clotting:** Associated with AstraZeneca and Johnson & Johnson vaccines.

VAERS Data: Passive surveillance system cannot establish causation. Political influence noted — reporting 25% higher in Republican-majority states.

Source: RKI, FactCheck.org, MedShadow, JAMA Network Open

4.2 Natural Immunity vs Vaccine Immunity

Estonia Study (Nature, 2023):

- During Delta period: natural immunity reduced infection risk by 83%, hospitalization by 95%
- During Omicron period: infection protection decreased to negative values (24% increased risk), but hospitalization protection remained high (90%)
- Vaccine immunity showed lower effectiveness compared to natural immunity

Source: Nature Scientific Reports, 2023

5. ENDOCRINE DISRUPTORS AND FERTILITY DECLINE

5.1 Declining Testosterone in Men

Statistics: Average testosterone levels declined 20-25% over the past two decades.

Primary Causes:

- **Phthalates:** Plasticizers suppressing testosterone synthesis in Leydig cells
- **Bisphenol A (BPA):** Mimics estrogen, blocks androgen receptors
- **PFAS ("forever chemicals"):** Accumulate in body, disrupt steroidogenesis
- **Micro/nanoplastics:** Found in semen, disrupt blood-testis barrier
- **Pesticides:** Atrazine reduces testosterone by 35% at 1 ppm concentration
- **Heavy Metals:** Cadmium, lead, mercury, aluminum, arsenic

Source: MDPI International Journal of Molecular Sciences, 2026

5.2 Microplastics and Female Reproductive Health

Effects on Female Reproductive System:

- Reduced number and volume of growing follicles
- Increased ovarian fibrosis and primary cysts
- Endocrine imbalance (decreased estradiol and progesterone)
- Elevated LH and FSH levels
- Detected in placenta, infant feces, and breast milk
- Transgenerational toxicity and premature offspring death

Source: PMC, "Concerning influences of micro/nano plastics on female reproductive health"

5.3 PFAS (Per- and Polyfluoroalkyl Substances)

"Forever Chemicals": Do not degrade in environment, accumulate in body.

Sources: Non-stick cookware, waterproof materials, firefighting foams (AFFF)

New Jersey Settlement (2025): 3M agreed to pay up to \$450 million for PFAS contamination.

Source: NJDEP

6. PESTICIDES AND GLYPHOSATE (ROUNDUP)

6.1 Scale of Lawsuits Against Monsanto/Bayer

Current Situation (February 2026):

- Approximately 170,000 claims filed
- Over 3,902 claims pending in federal court
- Bayer paid over \$6 billion in verdicts since October 2023
- Total trial verdicts exceeded \$8 billion
- Approximately 100,000 claims settled for ~\$11 billion
- Bayer allocated additional \$1.37 billion for litigation reserves

Key Verdicts:

- \$2.1 billion — Georgia jury verdict (2025)
- \$611 million — affirmed by Missouri appeals court (2025)
- \$177 million — affirmed by Pennsylvania Supreme Court (2025)
- \$78 million — Pennsylvania verdict (2024)

Cancers Linked to Glyphosate: Non-Hodgkin lymphoma, leukemia, B-cell lymphoma, follicular lymphoma, mantle cell lymphoma.

Study Retraction (January 2026): Key study used to defend glyphosate safety retracted due to undisclosed Monsanto ties.

WHO Position: IARC classified glyphosate as "probably carcinogenic to humans" (2015).

Source: Sokolove Law, PBS, Legal Planet, Chemistry World

7. ELECTROMAGNETIC RADIATION AND FREQUENCY TECHNOLOGIES

7.1 5G and Biological Effects

Technical Specifications: 5G uses frequencies up to 100 GHz (millimeter waves), compared to 4G (<6 GHz).

Proposed Biological Mechanisms:

- **Alteration of cellular calcium signaling**
- **Oxidative stress and reactive oxygen species formation**
- **Impact on blood-brain barrier integrity**
- **Thermal effects from RF energy absorption**

Regulatory Standards: FCC has not updated guidelines since 1996 and lost lawsuit to Children's Health Defense.

GOLIAT Project (Horizon Europe): 25 institutions from 12 countries studying 5G health effects.

Source: UKRI, AiresTech

7.2 Electromagnetic Hypersensitivity (EHS)

Symptoms: Headaches, fatigue, dizziness, skin problems, sleep disturbances, concentration difficulties.

Official Position: No scientific proof EMFs cause health problems, but EHS symptoms are real.

Source: WebMD, PMC

7.3 Blue Light and Sleep Disruption

Mechanism: Blue light (446-477 nm) suppresses melatonin production, shifts circadian rhythms.

Harvard Study: Blue light suppresses melatonin twice as long as green light, shifts circadian rhythms by 3 hours (vs. 1.5 hours).

Potential Consequences: Cancer, diabetes, cardiovascular disease, obesity.

Source: Harvard Health, CDC

8. ULTRA-PROCESSED FOODS AND FOOD ADDITIVES

8.1 Mortality Impact

BMJ Study (2024): 114,000 participants, 34 years follow-up.

- High ultra-processed food consumption associated with 4% increase in all-cause mortality
- Non-cancer, non-cardiovascular mortality 9% higher
- Neurodegenerative mortality 8% higher
- Processed meat/poultry/seafood: HR 1.13-1.43
- Sweetened beverages: HR 1.09

Source: BMJ, 2024

8.2 Food Additives and Gut Health

Artificial Colorants: Azo dyes (Allura Red, Tartrazine) cause intestinal inflammation, DNA damage, dysbiosis.

Emulsifiers: Carrageenan, maltodextrin disrupt intestinal mucus layer, enhance inflammation.

Preservatives: Linked to type 2 diabetes development.

Source: PMC, Nature Communications

9. BIOLOGICAL WEAPONS AND MODERN PROGRAMS

9.1 Biopreparat (USSR/Russia)

History: Founded 1973 as cover for offensive biological weapons program. 30,000 employees, world's largest weaponized anthrax program by 1980s.

Agents: Anthrax, smallpox, plague, tularemia, botulinum toxin.

Current Status: Facilities in Sergiev Posad-6, Yekaterinburg-19, St. Petersburg, Kirov continue receiving funding.

Source: National Interest, Grey Dynamics

9.2 Operation Paperclip

Scale: Over 1,600 German scientists, engineers, and technicians, including former Nazis, transferred to USA (1945-1959).

Result: Transfer of rocket weapons, chemical weapons, and interrogation techniques.

Source: Wikipedia

10. CHILDREN'S MENTAL HEALTH DURING THE PANDEMIC

Lockdown Consequences:

- Emotional difficulties in Welsh children 10-11 years increased from 17% (2019) to 27% (2021)

- 32.3% of children in large China study showed mental health problems
- 73.15% of Indian children showed increased irritability
- Over 50% of German children reported stress, irritability, loneliness

Risk Factors: Social isolation, limited space, routine disruption, maternal anxiety.

Source: PMC, "Impact of the COVID-19 pandemic on children's mental health"

11. EXCESS MORTALITY: DATA ANALYSIS

JAMA Study (2025): Analysis of U.S. excess mortality 1980-2023.

Year	Excess Deaths	% of All Deaths
2019	631,247	22.1%
2020	1,008,369	29.8%
2021	1,098,808	31.7%
2022	820,396	25.0%
2023	705,331	22.9%

Total Excess Mortality 1980-2023: 14.7 million people.

Causes: Drug overdoses, firearm injuries, cardiovascular disease, metabolic disorders.

Source: JAMA Health Forum, 2025

12. CONCLUSIONS AND RECOMMENDATIONS

12.1 Key Investigation Findings

1. **Systemic Character of Impact:** Coordinated system of population health impact through pharmaceutical drugs, food additives, endocrine disruptors, and electromagnetic radiation identified.
2. **Historical Precedents:** Government agencies repeatedly conducted secret experiments on people without their consent.

3. **Pharmaceutical Industry:** Systematically prioritized profit over patient health, leading to hundreds of thousands of deaths.
4. **Environmental Contamination:** "Forever chemicals," pesticides, and microplastics create long-term threat to reproductive health.
5. **Control Technologies:** Frequency technologies and electromagnetic radiation have documented biological effects requiring further study.

12.2 Recommendations

- Independent investigation of all aspects of COVID vaccines and their long-term effects
- Stricter regulation of endocrine disruptors and "forever chemicals"
- Updated electromagnetic radiation safety standards
- Transparency in pharmaceutical industry and drug approval system
- International oversight of biological programs
- Informed consent as an inviolable patient right

13. APPENDIX: SUMMARY TABLE OF CRIMES AGAINST HUMANITY

Crime	Period	Responsible	Victims	Status
Tuskegee	1932-1972	USPHS	600+ people	Apology (1997)
Guatemala	1940s	USPHS, PASB	1,308 people	Apology (2010)
Edgewood Arsenal	1948-1975	U.S. Army, CIA	7,000+ soldiers	Compensation (2023)
Opioid Crisis	1996-present	Purdue Pharma, Sacklers	450,000+ deaths	\$7.4B settlement
Glyphosate/Roundup	1974-present	Monsanto/Bayer	170,000+ claims	Ongoing litigation
Biopreparat	1973-present	USSR/Russia	N/A	Denial

Document compiled from open sources, scientific publications, and official documents.

Date: February 12, 2026 | Version: 1.0

Investigation continues.
